Slapicious Bass Licks in 31 Flavors – DVD Review

TRENCHES OF ROCK...

I was set to interview Michael Bloodgood this past February, the bassist and co-founder of the band Bloodgood, only one week prior to him suffering a hemorrhagic stroke and subsequent brain bleed, from which he never recovered. After a valiant fight, we lost Michael this past July.

While I am saddened that I did not have the opportunity to talk with him, his son Paul Michael Bloodgood will get to tell the story of his father's legacy in the upcoming film, TRENCHES OF ROCK. ...Michael will be missed.

Recommended 'Learning' With Damian Erskine: Roy Vogt |

Executive Produced by Oscar® and Grammy® winner James Moll (FOO FIGHTERS: BACK AND FORTH) and the recipient of 14 film festival awards, TRENCHES OF ROCK depicts the story of 1980s heavy metal band BLOODGOOD, who was targeted not only by a mainstream music industry that found their blatant use of faith-based lyrics an unfitting marriage with heavy metal, but also by religious extremists who believed their music was the work of the devil.

BLOODGOOD became a trailblazer of Christian Heavy Metal – touring the world and facing adversity head-on while confronted by death threats, picketers and protests against these “metal missionaries”. TRENCHES OF ROCK had its world premiere at the Atlanta Film Festival and garnered the attention of festivals worldwide, receiving numerous accolades including multiple “BEST FEATURE DOCUMENTARY” and “BEST DIRECTOR” awards. TRENCHES OF ROCK is directed by Lone Star Emmy® winner Paul Michael Bloodgood.
